SUMMARY

Full-stack developer specializing in backend systems using Node.js and Express.js. Experienced in building scalable applications with secure authentication, real-time updates, and payment integrations. Strong interest in system design and high-performance APIs.

PROJECTS

StudyNotion – EdTech Platform (Full Stack)

2025

- Developed a full-stack EdTech platform supporting course purchase and instructor onboarding.
- Implemented JWT-based authentication with OTP verification for secure user management.
- Integrated Razorpay payment gateway and Cloudinary for scalable media handling.
- Designed modular backend architecture for handling concurrent users efficiently.

Event & Movie Booking Platform (Full Stack)

2025

- Built a real-time movie and event booking platform with live seat selection.
- Implemented Redis-based seat locking to prevent race conditions during high traffic.
- Integrated Socket.io for real-time seat updates across multiple users.
- Developed QR-based ticket system with email delivery using Nodemailer.
- Added OAuth (Google) and phone/email authentication for seamless login experience.

EDUCATION

2023 – Present BCA, **SAGE University, Indore**

CGPA: 7.8

SKILLS

Languages	Java (DSA, OOP), JavaScript
Frontend	React.js
Backend	Node.js, Express.js
Database	MongoDB, Redis
