Summary

Full-stack developer specializing in backend systems with experience building scalable and real-time applications. Proficient in Node.js, Express.js, and Redis, with hands-on experience in designing REST APIs, implementing secure authentication (JWT, OAuth), and handling concurrency in distributed systems.

Projects

StudyNotion – EdTech Platform (Full Stack) 2025

- Built a full-stack EdTech platform enabling course purchases and instructor onboarding workflows.
- Implemented secure authentication using JWT and OTP verification for reliable session management.
- Integrated Razorpay payment gateway and Cloudinary for media storage and delivery.
- Designed and developed modular REST APIs improving scalability and maintainability.
- Deployed the application on Vercel with a production-ready setup.
- **Live:** study-time-final-frontend-app.vercel.app
- **GitHub:** github.com/gaurav-prasad-dev/Study-time-final

Event & Movie Booking Platform (Full Stack) 2025

- Developed a real-time booking system supporting concurrent users with dynamic seat selection.
- Implemented Redis-based locking mechanism to prevent race conditions during high traffic.
- Integrated Socket.io for real-time seat updates with low latency synchronization.
- Built QR-based ticket generation system with automated email delivery using Nodemailer.
- Implemented OAuth (Google) and phone/email authentication for secure login.

Education

Bachelor of Computer Applications (BCA)	SAGE University, Indore	2023 – Present
	CGPA: 7.8	

Skills

Languages	Java, JavaScript
Backend	Node.js, Express.js, REST APIs, Authentication (JWT, OAuth)
Frontend	React.js
Databases	MongoDB, Redis
Core Concepts	Data Structures & Algorithms, OOP, Concurrency
Tools	Git, GitHub, Postman
Technologies	Razorpay, Cloudinary, Socket.io

Achievements & Leadership

- Coordinated large-scale sports events at SAGE Euphoria (2024, 2025), managing teams and logistics.
